#### Attachment F

As per APRA reporting standard APS 210, APRA requires ADIs to maintain a minimum 100% Liquidity Coverage Ratio (LCR). The LCR requires banks to hold sufficient High Quality Liquid Assets (HQLA) to meet net cash outflows over a 30-day period, under a regulator-defined stress scenario.

ME's LCR for the quarter ending 31 December 2021 is presented in the following table (Table 20: LCR disclosure template), using the disclosure template specfied in Attachment F of APS 210 and is based on a simple average of daily LCR calculations for the quarter (i.e. 64 data points for the quarter ended 31 December 2021).

The Risk Appetite Statement (RAS) is approved by the Board and managed via the relevant management committee. The Asset and Liability Committee (ALCO) is tasked with the management and oversight of the Bank's financial risk exposures within the Board-set risk appetite. This includes capital, liquidity and funding, and interest rate risk in the banking book.

Treasury manages the Bank's liquidity and funding positions in accordance with the Board approved RAS and policy delegations. LCR is calculated daily by Treasury for liquidity management purposes and to ensure regulatory and internal buffers are maintained. The Market and Liquidity Risk department provide independent oversight of Treasury and calculate and report the Bank's LCR on a daily basis.

NCO volatility is the primary driver of fluctuations in LCR. NCO is managed by Treasury with the Bank holding sufficient liquidity buffers to absorb potential unexpected volatility.

ME's mix of High Quality Liquid Assets (HQLA), include cash, deposits with central banks, Australian Semi Government and Commonwealth Government securities. Liquid assets also include repo-eligible securities with the Reserve Bank of Australia held as Committed Liquidity Facility (CLF) collateral. ME's CLF is fully collateralised at all times.
